Projects

Stock Market Trader Project

- Developed a dynamic financial analysis dashboard that allows users to explore real-time stock data.
- Stock Search : Effortlessly search and access information on all stocks in the us market , making it easier to find data you need to search
- Interactive Charts : Analyse stock prize changes with interactive chart displaying 1-day , 1-week , and 1-month performance trends.
- Financial News : Stay in the known with dedicated page featuring financial news from around the world.
- Personalized Wishlist : Create your personalized stock Wishlist , and receive daily email updates on the opening and closing prices of your selected stocks.

- Tech Stack:
  Frontend: Developed using React.js, HTML, CSS, JS.
  Backend: Powered by Node.js and Express.js

Shop Now App

- Built an E-Commerce Web Application using ReactJs, NodeJs, ExpressJs and MySql as an Backend database.
- The main features are to view all products, choose products by category, and view product details.
- The Application in Android runs smoothly as long as there's an internet connection and it is easy to use.

Experience and Leadership

- Completed a simulation focused on advising a hypothetical social media client as a Data Analyst at Accenture.
- Successfully completed online certifications in Web Development (HTML, CSS, JS, React.Js)**, C++, and** Java from reputed platforms, enhancing full-stack and object-oriented programming skills.
- Served two time as House Captain and Once as Head Boy in the School Academics.

Extra-Curricular Activities

- Actively participated and secured 2nd Position and 3rd Position in J&K UT Powerlifting Competition held at Jammu in year 2024
- Won multiple medals and trophies (in sports events) during the School Academics
- Actively participated and a team member in Inter-departmental Bhangra (Folk Dance) competition held at Guru Nanak Dev University securing 1st position.
